A LITTLE ABOUT ME

A creative and people-oriented computer scientist with project management experience. Advanced knowledge in object-oriented programming and relevant programming languages to the web front end.

PROJECTS

- Graph Representation System and Graph Navigation Game - OOP Project.
Using: Java, GUI, KML and Graph algorithms.
Construct directed graphs and manipulate the graphs using graph algorithms. And map navigation game that finds the fastest path between 2 points on a map like a GPS. The whole system support UI.
github.com/dorlevi121/Graph-Representation-and-Navigation-System
- Restaurant Management System.
Using: ReactJS, Redux, SCSS, HTML, Event Emitter and TypeScript
The system includes a meal reservation system, queue management, kitchen positions, shipping, stock, and restaurant budget.
github.com/dorlevi121/Restaurant-management-system
- Checkers Game - Using: ReactJS, HTML, CSS.
I implemented all the rules game, redo and undo options.
